

Etter Gin 40% vol. Swiss Gin

Storage/maturing:	12 months in stainless-steel tanks
Colour:	deep, intense red
Bouquet:	complex with a subtle citrus note
Taste:	an elegant gin with harmoniously integrated spicy nuances and fine orange accents. Smooth and mild on the palate, with a long, well-balanced finish
Our Tip:	Etter Gin delights both neat and as a refined addition to your favourite drink. Its vibrant colour gives every cocktail a striking visual appeal in the glass.

Limited & numbered

limited edition "cherry" – a traditional recipe, stylishly reinterpreted

While preparing for our 150th anniversary in 2020 we were „rummaging through“ our archives when we came across an interesting recipe in some very old books. Our family's ancestors had always concentrated on kirsch, but evidently a "herb" had also been distilled. We found these recipes so fascinating that we adjusted them a little to fall in line with the trends of the day and thereby created a first-class Etter Gin.

Even by producing gin, we are still remaining true to our homeland. On the one hand there is naturally some Etter Kirsch worked into the gin, and on the other hand, the juniper berry, as described in the old recipes, still comes in part from the Rossberg area. The Rossberg is a chain of hills in Cantons Zug and Schwyz. The highest elevation and hence the highest point in Canton Zug is the Wildspitz with a bombastic view over Central Switzerland – a nostalgic place for the Etter family. The local herbs used in years gone by have been fortified with various aromatic botanicals – 75 in all! In acquiring this amazing variety, we were assisted by a traditional Zug company, located in Zug since 1775, J.C. Fridlin Spices. Hence our Etter Gin is a limited edition.

The third edition "cherry" presents itself in a vibrant red and becomes a stylish eye-catcher in every bar. Carefully selected botanicals give this gin an impressive complexity as well as the signature harmonious balance of Etter.

Once again, delicate cherry blossoms refine the composition. In their symbolism, cherry blossoms represent joy of life and happiness – embodying the pleasure of living and the mindful enjoyment of the moment. Experience this elegant gin – and celebrate the moment. Cheers!
